**MEMORANDUM FOR: Project Director**

**SUBJECT: Satellite Targets**

1. It is understood that the Project may be interested in the near future in Satellite targets. I have requested the Ad Hoc Requirements Committee to provide their judgment with regard to priority targets in the Satellite area at an early date.

2. The Requirements Committee has requested me to inform you of its judgment, based on its review of high priority Far East targets and a similar review in process with regard to Western Soviet Satellite targets, that by all odds these are of far greater importance as far as critical intelligence is concerned than targets in the Satellite area. It is pointed out, however, that exceptions to this will arise from time to time.

  
**JAMES Q. REBER**  
Intelligence Requirements Officer
